More than 15 after-school clubs and activities including, cooking club, entrepreneur class, fashion exchange, Muslim student association, QSA, poetry and spoken word, Mural Arts

- Basketball, Football, Volleyball, Lacrosse, Cross-Country
- Social activism projects and courses
- International travel through annual spring study abroad trip

“I love Shoemaker because the teachers get to know me and motivate me to do better and always find opportunities. Once they know you, they help you find opportunities to experience other things and network with the larger community. My dean linked me up with the STEM program and my science teacher encouraged me to join Pipeline program.”
- Aminita Souna, Class of 2022

Students graduate ready for college & careers

• AP classes and dual enrollment to earn college credit while still in high school
• Sophomores complete an internship to gain valuable real-world work experience
• Dedicated team to help students prepare for the ACT and apply to colleges
• Class of 2018 earned $7.7 in scholarships

EAGLE STEM/VEX Robotics Program for Girls

• Our high school girls interested in STEM (Science, Technology, Engineering Math) have the opportunity to participate in EAGLE, a four-year program that presents them with challenges in a hands-on and fun team setting.
• Freshmen begin with an underwater robotics competition where they will build an underwater Remotely Operated Vehicle using electrical engineering skills like soldering and circuitry.
• Using physics, engineering math, sophomores work together and build a whole wooden boat from start to finish.
• Juniors learn the fundamentals of land-based robotics including computer programming, 3-D printing, design, CAD and robotic construction.
• In their senior year, girls combine everything they learned to design, program and build a robot for the VEX Robotics FIRST Robotics Tech Challenge Competition.

University of Pennsylvania Perelman School of Medicine Educational Pipeline Program

• Dissections. Radiographic imaging. CPR training. These are just a few activities students participate in with the University of Perelman School of Medicine Educational Pipeline Program.

Program perks:

• Mentoring by Penn faculty and students and networking with health practitioners
• Preference for Penn’s paid Pipeline Plus summer job program and connections to other Penn programs
• Wednesday afternoons, throughout the second semester, on University of Penn’s campus

Sophomore Internships

Our Internship Program gives sophomores an opportunity many of their peers don’t get until college: a chance to gain real-world work experience and discover what could be the career of their dreams. Students prepare for their internships in the fall semester of their sophomore year. They take a seminar that teaches them workplace communication skills, time management, resume development, interview techniques workplace etiquette. In the spring semester, students begin their internship, working from 2:00 – 5:00 p.m. every Wednesday from January through June.

MCS@CCP - Senior Year Dual Enrollment

• Students spend their entire senior year at Community College of Philadelphia, earning college credits and a high school diploma at the same time!
• 90% of the class of 2018 cohort completed the program.
• Some students earned as many as 25 college credits!
• 100% of the students who successfully completed the program are now attending a 4-year college.
• 80% received financial aid.
• 2 students earned scholarships.
